If You Liked That, You'll Love These

Thanks for starting your learning journey here in the Real Vision Crypto Academy. If you liked Crypto Academy Session Ep. 1 with Raoul Pal, OSF, and Mando, you'll love the recommended videos listed below.

As you work through the Academy, give your journey a boost with our Knowledge Drops, Academy quizzes, and Playlists. All the written materials in the Academy are here to help you tie it all together.

Enjoy.

Crypto Academy Sessions, Ep. 2 — Why Macro is Fundamental to Crypto

A former high-yield credit trader at Barclays in London turned Web3 artist and crypto investor, OSF understands financial markets like few others in macro or crypto. So, if there's anyone more equipped to lead a course on why understanding macro markets is so important for your crypto development, we haven't found them yet.

In this tutorial, OSF walks you through how various macro indicators can have a huge impact on crypto prices; explaining the correlations between the two markets, and the economic data that investors need to watch. If you're looking to build sustainable profits in crypto, OSF says it's time to stop ignoring TradFi market events. We tend to agree...

The Real Investing Course, Module 1 — Investing Psychology

When it comes to investing — be it in crypto or macro markets — "quick fixes" that ultimately fizzle out are easy to find. Anyone can follow trade alerts on Twitter, but to grow as an investor requires an understanding of your own unique goals, time horizons, and risk tolerances.

To paraphrase Adam Smith, if you don't know who you are, the market is an expensive place to find out.

That's what this 3-part module from the Real Investing Course is all about. Throughout the lesson, you'll hear from trading legends like Mike Green, Brent Johnson, Pierre Andurand, and Jason Buck, plus Raoul Pal and a slew of other Real Vision experts. They walk us through how to build the knowledge foundation you'll need to become a confident investor, how to filter through the continuous flow of market data, and how to know where you fit in this game of investing.

This module will help you make quick, informed decisions, capture upside moves, and limit drawdowns on your portfolio. And that's really what it's all about.

Balaji's Network State

No digital asset investing course is complete without a mind-blowing deep dive that pushes us to think longer and harder about the future than we ever have before.

This epic 2.5-hour conversation between Raoul Pal and angel investor Balaji Srinivasan is exactly that. Throughout the episode, Raoul and Balaji discuss the state of the internet, the metaverse, the crypto ecosystem, and the emerging concept of "network-states" — globalized communities that Balaji believes will organize and operate with their own virtual currencies.

If the future looks anything like what Balaji and Raoul discuss, then crypto investors need to understand the digital infrastructure that will help it take shape — and how to profit from it. Whether you watch it in one sitting or split it up over a week, don't miss this Real Vision classic.
