Why Liquidity Matters More Than Anything Else

Anyone who invested through the most recent post-COVID cycle should have some understanding of how important global liquidity levels are to all asset classes — from stocks to oil to cryptocurrencies.

In this episode of The Journey Man from April 2023, Raoul speaks with Michael Howell, CEO of CrossBorder Capital and perhaps the world's leading expert on liquidity, about why global money supply signals are pointing towards a new bull market in risk assets.

Raoul and Michael dive deep into how the models and strategies used by central bankers are changing, how that's impacting government balance sheets and driving fiat currency debasement, and what it means for investors looking to ride the next secular wave to profits.

Specifically, the guys detail how tracking liquidity levels can help us recognize turning points in certain assets and sectors — from gold and BTC to the Nasdaq. It's a masterclass on liquidity that your future self will thank you for watching.
