## If You Liked That, You'll Love These

*Thanks for continuing your learning journey here in the Real Vision Crypto Academy. If you liked this episode with Dave Floyd, you'll love the recommended videos listed below.*

*As you work through the Academy, give your journey a boost with our Knowledge Drops, Academy quizzes, and Playlists. All the written materials in the Academy are here to help you tie it all together.*

*Enjoy.*

## A Trip Inside the Trader Brain

As you heard from Dave, understanding who you are as an investor or trader starts with developing an understanding of yourself — your goals, your motivations, and your temperament.

In this discussion from the 2023 Festival of Learning, Raoul Pal and Tony Greer sat down for an insightful discussion with Denise Shull, the famed Wall Street performance coach who inspired the character of Wendy Rhoades in Billions, to see if she could help them better understand the impulses that shape their individual investment decisions.

This conversation is a masterclass in psychoanalysis, and watching Denise pull at the threads that have made Raoul and Tony the investors they are today is eye-opening for anyone hoping to better understand their own journey in markets.

From how Raoul's early world travels as a child of immigrants shaped his information-gathering process to how Tony's hyper-competitive blue-collar background still dictates his core trading strategies, you'll learn things about these two that you've likely never heard before. But the conversation isn't all personal — Tony and Raoul offer plenty of actionable tips for how to develop your own investing framework, too.

## Crypto Academy Sessions, Ep. 1 — Intro

If you haven't started our 5-part tentpole series, the Crypto Academy Sessions, there's no better time then now.

In the first episode, Rauol Pal is joined by the series hosts, professional traders and crypto entrepreneurs OSF and Mando, to discuss their background in both TradFi and DeFi markets, their crypto trading strategies, and where they'll take us in this Crypto Academy journey.

The conversation is the perfect setup for all of the other content that you'll find in the Academy, but the reason we've highlighted it here is because of the clear parallels between how Dave Floyd trades traditional markets and the strategies that OSF and Mando employ in crypto.

Much like Dave's approach, OSF and Mando emphasize the importance of flexibility, discipline, and time frames when trading crypto markets. They share their risk management and portfolio-sizing strategies, explain how they journal daily trades and ideas, and regularly reevaluate positions. They also employ a strategy of "concentrated diversification," which aligns with Dave's advice to start by focusing on a small number of markets that you can master.

If you haven't watched this one yet, be sure to catch up.

# How to Profit From the Coming AI Boom

In September 2023, Raoul sat down with tech analyst Beth Kindig, founder and CEO of the I/O Fund, to hear her investment case for tech — particularly AI.

According to Beth, AI is "the biggest investment opportunity of our lifetimes." She and Raoul discuss how AI is revolutionizing the tech sector, how it will dramatically change the macro environment, the companies poised to benefit most, and the mindset tech investors should adopt to capitalize on the trend.

But this interview isn't all big picture. Beth shares how she approaches portfolio construction and risk management, discusses some of her favorite trades in the tech sector for both the near- and long-term, and shares how she stays flexible and disciplined in order to capitalize on market rotations.

When it comes to mastering the tech market, no one does it quite like Beth.
